Electro-hydraulic actuators for valves

with a 40 mm stroke

SKC32..
SKC82..
SKC62..
SKC60

- **SKC32.. Operating voltage AC 230 V, 3-position control signal**
- **SKC82.. Operating voltage AC 24 V, 3-position control signal**
- **SKC6.. Operating voltage AC 24 V, control signal DC 0…10 V, 4…20 mA or 0...1000 Ω**
- **SKC6.. Choice of flow characteristic, position feedback, stroke calibration, LED status indication, override control**
- **SKC62UA with functions choice of direction of operation, stroke limit control, sequence control with adjustable start point and operating range, operation of frost protection monitors QAF21.. and QAF61..**
- **Positioning force 2800 N**
- **Actuator versions with or without spring-return function**
- **For direct mounting on valves; no adjustments required**
- **Manual adjuster and position indicator**
- **Optional functions with auxiliary switches, potentiometer, stem heater and mechanical stroke inverter**
- **SKC..U are UL-approved**

Use

For the operation of Siemens 2-port and 3-port valves, types VVF.. and VXF.. with a 40 mm stroke as control and safety shut-off valves in heating, ventilation and air conditioning systems.

Types

	Type	Operating voltage	Positioning signal	Spring-return Function	Spring-return Time	Positioning time Opening	Positioning time Closing	Enhanced functions
Standard electronics	**SKC32.60**	AC 230 V	3-position			120 s	120 s

Enhanced electronics	**SKC62UA ***			yes	20 s			yes [1]

[1] Direction of operation, stroke limit control, sequence control, signal addition

* UL-approved versions

Accessories

Type	Description	For actuator	Mounting location
ASC1.6	Auxiliary switch	SKC6..	1 x ASC 1.6
ASC9.3	Dual auxiliary switches	SKC32.. SKC82..	1 x ASC9.3 or
ASZ7.3	Potentiometer 1000 Ω		1 x ASZ7.3 or
ASZ7.31	Potentiometer 135 Ω		1 x ASZ7.31 or
ASZ7.32	Potentiometer 200 Ω		1 x ASZ7.32
ASZ6.5	Stem heater AC 24 V	SKC..	1 x ASZ6.5

Ordering

When ordering please specify the quantity, product name and type code.
Example: **1 actuator, type SKC32.60** and
1 potentiometer, 135 Ω, type ASZ7.31

Delivery

The actuator, valve and accessories are supplied in separate packaging and not assembled prior to delivery.

Spare parts

See overview, section «Replacement parts», page 16.

Equipment combinations

Valve type		DN	PN-class	k_{vs} [m^3/h]	data sheet
Two-port valves VV... (control valves or safety shut-off valves)):					
VVF21...	Flange	100	6	124…160	4310
VVF31...	Flange	100…150	10	124…315	4320
VVF40...	Flange	100…150	16	124…315	4330
VVF41...	Flange	65…150	16	49…300	4340
VVF45...	Flange	65…150	16	49…300	4345
VVF61...	Flange	65…150	40	49…300	4382
Three-port valves VX... (control valves for «mixing» and« distribution»):					
VXF21...	Flange	100	6	124…160	4410
VXF31...	Flange	100…150	10	124…315	4420
VXF40...	Flange	100…150	16	124…315	4430
VXF41...	Flange	65…150	16	49…300	4440
VXF61...	Flange	65…150	40	49…300	4482

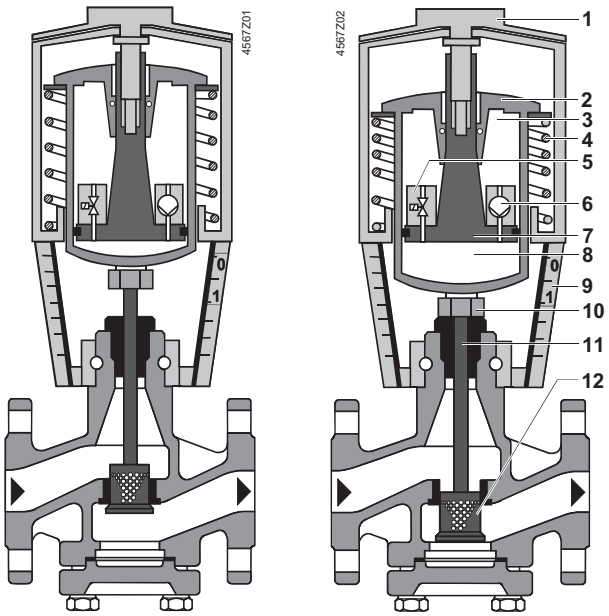
For admissible differential pressures Δp_{max} and closing pressures Δp_s, refer to the relevant valve data sheets.

Note

Third-party valves with strokes between 12…40 mm can be motorized, provided they are «closed with the de-energized» fail-safe mechanism and provided that the necessary mechanical coupling is available. For SKC32.. and SKC82.. actuators the Y1 signal must be routed via an additional freely-adjustable end switch (ASC9.3) to limit the stroke.
We recommend that you contact your local Siemens office for the necessary information.

Technology

Principle of electro-hydraulic actuators



Valve closed Valve open

1 Manual adjuster
2 Pressure cylinder
3 Suction chamber
4 Return spring
5 Solenoid valve
6 Hydraulic pump
7 Piston
8 Pressure chamber
9 Position indicator (0 to 1)
10 Coupling
11 Valve stem
12 Plug

Opening the valve

The hydraulic pump (6) forces oil from the suction chamber (3) to the pressure chamber (8) and thereby moving the pressure cylinder (2) downwards. The valve stem (11) retracts and the valve opens. Simultaneously the return spring (4) is compressed.

Closing the valve

Activating the solenoid valve (5) allows the oil in the pressure chamber to flow back into the suction chamber. The compressed return spring moves the pressure cylinder upwards. The valve stem extends and the valve closes

Manual operation mode

Turning the manual adjuster (1) clockwise moves the pressure cylinder downwards and opens the valve. Simultaneously the return spring is compressed.
In the manual operation mode the control signals Y and Z can further open the valve but cannot move to the «0%» stroke position of the valve. To retain the manually set position, switch off the power supply or disconnect the control signals Y and Z. The red indicator marked «MAN» is visible.

Note: Controller in manual operation

When setting the controller for a longer time period to manual operation, we recommend adjusting the actuator with the manual adjuster to the desired position. This guarantees that the actuator remains in this position for that time period. Attention: Do not forget to switch back to automatic operation after the controller is set back to automatic control.

Automatic mode

Turn the manual adjuster counterclockwise to the end stop. The pressure cylinder moves upward to the «0%» stroke position of the valve. The red indicator marked «MAN» is no longer visible.

Minimal volumetric flow

The actuator can manually be adjusted to a stroke position > 0 % allowing its use in applications requiring constantly a minimal volumetric flow.

Spring-return facility

The SKC32.61, SKC82.61.. and SKC62.. actuators, which feature a spring-return function, incorporate an additional solenoid valve which opens if the control signal or power fails. The return spring causes the actuator to move to the «0 %» stroke position and closes the valve in accordance with the safety requirements set out in DIN 32730.

SKC32../SKC82..
3-position control signal

The valve is controlled by a 3-position signal either via terminals Y1 or Y2 and generates the desired stroke by means of above described principle of operation.

- Voltage on Y1 — piston extends — valve opens
- Voltage on Y2 — piston retracts — valve closes
- No voltage on Y1 and Y2 — piston / valve stem remain in the respective position

SKC62.., SKC60
Y control signal
DC 0...10 V and/or
DC 4...20 mA, 0…1000 Ω

The valve is either controlled via terminal Y or override control Z. The positioning signal Y generates the desired stroke by means of above described principle of operation.

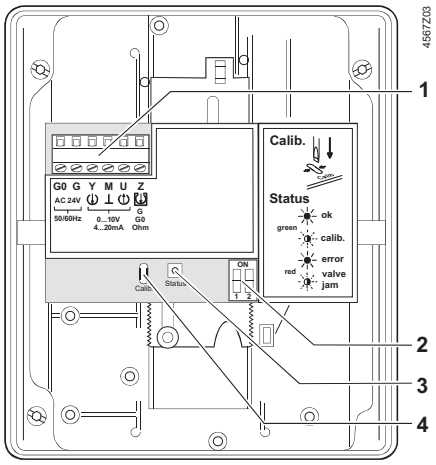
- Signal Y increasing: — piston extends — valve opens
- Signal Y decreasing: — piston retracts — valve closes
- Signal Y constant: — piston / valve stem remain in the respective position
- Override control Z — see description of override control input, page 7

Frost protection monitor
Frost protection thermostat

A frost protection thermostat can be connected to the SKC6.. actuator. The added signals from the QAF21.. and QAF61.. require the use of SKC62UA actuators. Notes on special programming of the electronics are described under «Enhanced electronics» on page 5.

«Connection diagrams» for operation with frost protection thermostat or frost protection monitor refer to page 15.

Standard electronics
SKC62.., SKC60



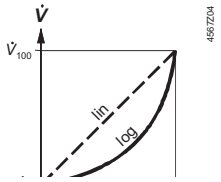
1 Connection terminals
2 Mode DIL switches
3 LED status indication
4 Slot for calibration

DIL switches
SKC62.., SKC60

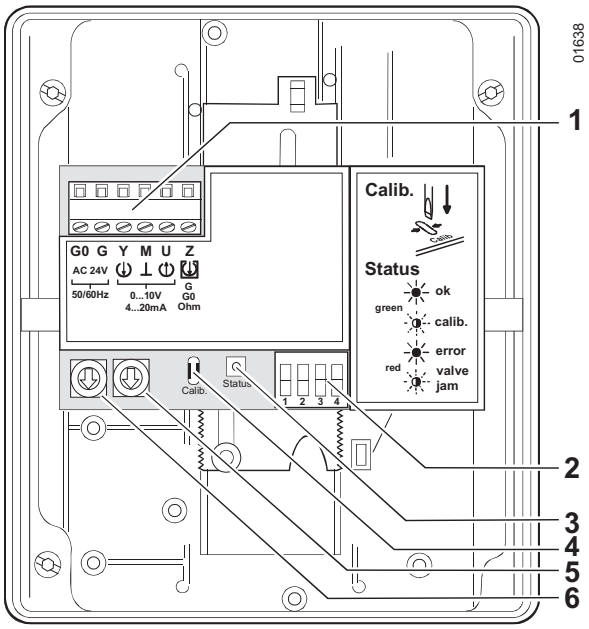
	Positioning signal Y Position feedback U	Flow characteristic
ON	 DC 4…20 mA	 lin = linear
OFF *)	 DC 0…10 V	 log = equal percentage

*) Factory setting:
All switches OFF

Relationship between control signal Y and volumetric flow



Enhanced electronics
SKC62UA



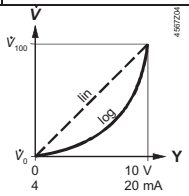
1 Connection terminals
2 DIL switches
3 LED status indication
4 Stroke calibration
5 Rotary switch **Up** (factory setting 0)
6 Rotary switch **Lo**

DIL switches
SKC62UA

	Direction of operation	Sequence control or stroke limit control	Control signal Y Position feedback U	Flow characteristic
ON	reverse-acting	Sequence control Signal addition QAF21../QAF61..	DC 4...20 mA	lin = linear
OFF *	direct-acting	Stroke limit control	DC 0...10 V	log = equal percentage

* Factory settings: all switches OFF

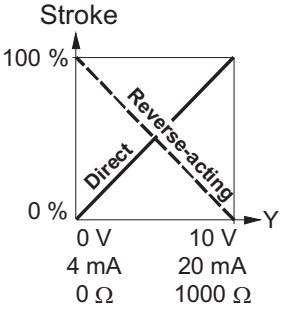
Relationship between control signal Y and volumetric flow



Selection of direction of operation
SKC62UA

- With normally-closed valves, «direct-acting» means that with a signal input of 0 V, the valve closes (applies to all Siemens valves listed under «equipment combinations» on page 2)
- With normally-open valves, «direct-acting» means that with a signal input of 0 V, the valve is open.

Direct acting	Reverse-acting
	Input DC 0...10 V DC 4...20 mA 0...1000 Ω	Input DC 10...0 V DC 20...4 mA 1000...0 Ω

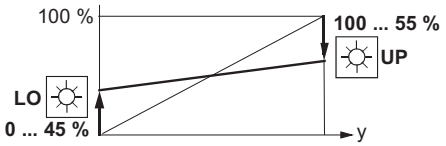


Note The mechanical spring-return function is not affected by the direction of operation selected.

Stroke limit control and sequence control SKC62UA

Setting the stroke limit control

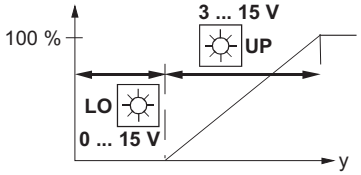
The rotary switches LO and UP can be used to apply an upper and lower limit to the stroke in increments of 3%, up to a maximum of 45%



Position of LO	Lower stroke limit	Position of UP	Upper stroke limit
0	0 %	**0**	100 %
1	3 %	**1**	97 %
2	6 %	**2**	94 %
3	9 %	**3**	91 %
4	12 %	**4**	88 %
5	15 %	**5**	85 %
6	18 %	**6**	82 %
7	21 %	**7**	79 %
8	24 %	**8**	76 %
9	27 %	**9**	73 %
A	30 %	**A**	70 %
B	33 %	**B**	67 %
C	36 %	**C**	64 %
D	39 %	**D**	61 %
E	42 %	**E**	58 %
F	45 %	**F**	55 %

Setting the sequence control

The rotary switches LO and UP can be used to determine the starting point or the operating range of a sequence.



Position of LO	Starting point for sequence control	Position of UP	Operating range of sequence control
0	0 V	**0**	10 V
1	1 V	**1**	10 V *
2	2 V	**2**	10 V **
3	3 V	**3**	3 V ***
4	4 V	**4**	4 V
5	5 V	**5**	5 V
6	6 V	**6**	6 V
7	7 V	**7**	7 V
8	8 V	**8**	8 V
9	9 V	**9**	9 V
A	10 V	**A**	10 V
B	11 V	**B**	11 V
C	12 V	**C**	12 V
D	13 V	**D**	13 V
E	14 V	**E**	14 V
F	15 V	**F**	15 V

* Operating range of QAF21.. (see below)
** Operating range of QAF61.. (see below)
*** The smallest adjustment is 3 V; control with 0…30 V is only possible via Y.

Stroke control with QAF21.. / QAF61.. signal addition SKC62UA only

Setting the signal addition

The operating range of the frost protection monitor (QAF21.. or QAF61..) can be defined with rotary switches LO and UP.

Position of LO	Sequence control start point	Position of UP	QAF21../ QAF61.. operating range
0		**1**	**QAF21..**
0		**2**	**QAF61..**

Calibration
SKC62.., SKC60

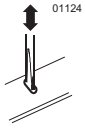
In order to determine the stroke positions 0 % and 100 % in the valve, calibration is required on initial commissioning:

Prerequisites

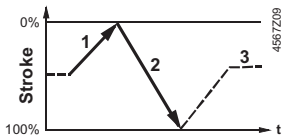
- Mechanical coupling of the actuator SKC6.. with a Siemens valve
- ⚠ **Actuator must be in «Automatic operation» enabling stroke calibration to capture the effective 0 % and 100 % values**
- AC 24 V power supply
- Housing cover removed

Calibration

1. Short-circuit contacts in calibration slot (e.g. with a screwdriver)
2. Actuator moves to «0 %» stroke position (1) (valve closed)
3. Actuator moves to «100 %» stroke position (2) (valve open)
4. Measured values are stored



green LED flashes; position feedback U inactive



Normal operation

5. Actuator moves to the position (3) as indicated by signals Y or Z	green LED is lit permanently; position feedback U active, the values correspond to the actual positions

A lit red LED indicates a calibration error.

Indication of operating state
SKC62.., SKC60

The LED status indication indicates operational status with dual-colored LED and is visible with removed cover.

LED	Indication	Function	Remarks, troubleshooting
Green	Lit	Normal operation	Automatic operation; everything o.k.
	Flashing	Calibration in progress	Wait until calibration is finished (LED stops flashing, green or red LED will be lit)
Red	Lit	Faulty stroke calibration	Check mounting Restart stroke calibration (by short-circuiting calibration slot)
		Internal error	Replace electronics
	Flashing	Inner valve jammed	Check valve
Both	Dark	No power supply	Check mains network, check wiring
		Electronics faulty	Replace electronics

As a general rule, the LED can assume only the states shown above (continuously red or green, flashing red or green, or off).

Override control input Z
SKC62.., SKC60

Override control input can be operated in following different modes of operation

	Z-mode				
	no function	**fully open**	**closed**	**override with 0…1000 Ω**	**Signal addition** SKC62UA only
Connections					Transfer						linear or equal-percentage			linear or equal-percentage	linear or equal-percentage
	• Z-contact not connected • Valve stroke follows Y-input	• Z-contact connected directly to G • Y-input has no effect	• Z-contact connected directly to G0 • Y-input has no effect	• Z-contact connected to M via resistor R • Starting position at 50 Ω / end position at 900 Ω • Y-input has no effect	• Z-contact is connected to R of the frost protection monitor QAF21.. or QAF61.. • Valve stroke follows signals Y **and** R(Z)

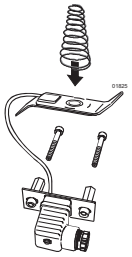
4567Z10

Note

Shown operation modes are based on the factory setting «direct acting»
Y-input has no effect in Z-mode.

SKC..

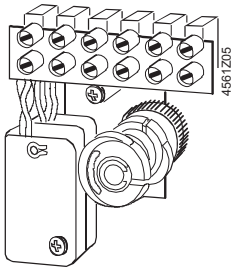
ASZ6.5
stem heater



- for media below 0 °C
- mount between valve and actuator

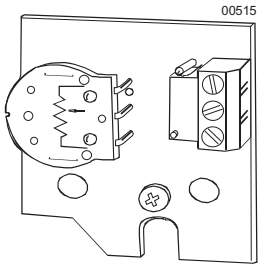
SKC32.., SKC82..

ASC9.3
double auxiliary switch



adjustable switching points

ASZ7.3..
potentiometer



ASZ7.3: 0…1000 Ω
ASZ7.31: 0…135 Ω
ASZ7.32: 0…200 Ω

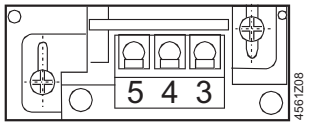
ASC1.6
auxiliary switch



switching point 0…5 % stroke

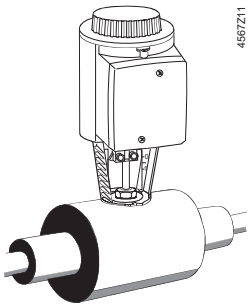
See section «Technical data» on page 12 for more information.

Engineering notes

Conduct the electrical connections in accordance with local regulations on electrical installations as well as the internal or connection diagrams.

Caution ⚠ **Safety regulations and restrictions designed to ensure the safety of people and property must be observed at all times!**

Caution ⚠ **For media below 0 °C the ASZ6.5 stem heater is required to keep the valve from freezing. For safety reasons the stem heater is designed for an operating voltage of AC 24 V / 30 W.**
For this case, do not insulate the actuator bracket and the valve stem, as air circulation must be ensured. Do not touch the hot parts without prior protective measures to avoid burns.
Non-observance of the above may result in accidents and fires!
Recommendation: Above 140 °C insulating the valves is strictly recommended.



Observe admissible temperatures, refer to «Use» on page 1 and «Technical data» on page 12

If an auxiliary switch is required, its switching point should be indicated on the plant schematic.

Every actuator must be driven by a dedicated controller (refer to «Connection diagrams», page 15).

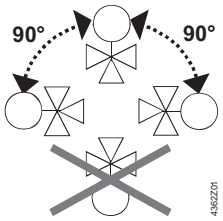
Mounting instructions

Mounting Instruction 74 319 0324 0 for fitting the actuator to the valve are by packed in the actuator packaging. The instructions for accessories are enclosed with the accessories themselves.

Accessories	Installation instructions	
ASC1.6	G4563.3	4 319 5544 0
ASC9.3	G4561.3	4 319 5545 0
SKC..	M3240	74 319 0324 0
SKC..		74 319 0326 0

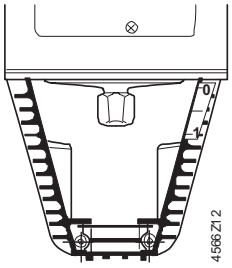
Accessory	Mounting instructions	
ASZ6.5	M4563.7	4 319 5564 0
ASZ7.3..		74 319 0247 0
ACT control unit	M4568	74 319 0554 0
QAF21..		74 319 0399

Orientation

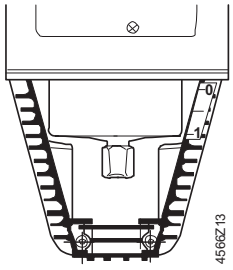


When commissioning the system, check the wiring and functions, and set any auxiliary switches and potentiometers as necessary, or check the existing settings.

Cylinder with valve stem connector fully retracted
→ stroke = 0%



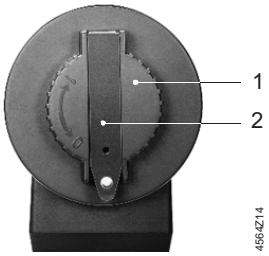
Cylinder with valve stem connector fully extended
→ stroke = 100 %



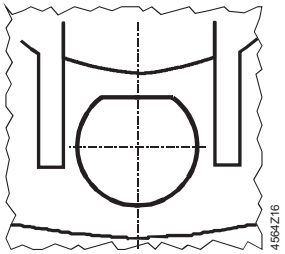
⚠ **The manual adjuster must be rotated counterclockwise to the end stop. This causes the Siemens valves, types VVF.. and VXF.. to close (stroke = 0 %).**

Automatic operation

For automatic operation, the crank (**2**) on the manual adjustment knob (**1**) must be engaged. If not engaged, turn the crank counter-clockwise until the display window (**3**) neither shows the scale (**4**) nor the crank engagement bar.



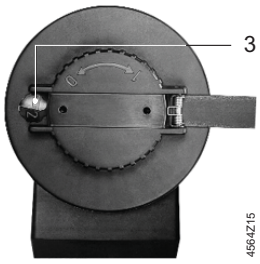
Engaged crank (**2**) on the manual adjustment knob (**1**)



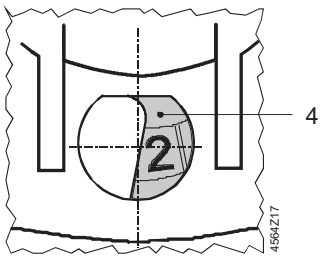
Display window with invisible scale dial and crank engagement bar

Manual operation

For manual operation, swing out the crank (**2**) so that the display window (**3**) becomes visible. By rotating the crank or the manual adjustment knob (**1**), the display window shows the engagement bar and/or the scale dial with stroke indication.



Swung-out crank, display window (**3**)



Display window with scale dial (**4**) and stroke indication

Maintenance notes

The SKC.. actuators are maintenance-free.

⚠ When servicing the actuator:

- Switch off pump of the hydronic loop
- Interrupt the power supply to the actuator
- Close the main shutoff valves in the system
- Release pressure in the pipes and allow them to cool down completely
- If necessary, disconnect electrical connections from the terminals
- The actuator must be correctly fitted to the valve before recommissioning.

Recommendation SKC6..: trigger stroke calibration.

Repair «Replacement parts», see page 16.

Disposal

The device contains electrical and electronic components and must not be disposed of together with domestic waste. This applies in particular to the PCB.

Legislation may demand special handling of certain components, or it may be sensible from an ecological point of view.

Current local legislation must be observed.

Warranty

The technical data relating to specific applications are valid only in conjunction with the valves listed in this Data Sheet under «Equipment combinations», page 2.

⚠ **The use of the actuators in conjunction with third-party valves invalidates all claims under Siemens Switzerland Ltd / HVAC Products warranty.**
